

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The Senile Heart.¹³—In this small octavo of some three hundred pages, Dr. G. M. Balfour states the causes for the enlarged heart frequently found in adults past their prime, its symptoms, and the concomitants and sequelæ. He then suggests a general mode of treatment for this widespread cardiac trouble followed by a chapter on the prognosis of special symptoms and the treatment with special reference to these symptoms.

Marginal synopses of the points touched upon in the several paragraphs make the book a handy reference volume.

Sixth Annual Report of the Missouri Botanical Gardens.¹⁴—This Report includes the following scientific papers: Revision of the North American species of *Sagittaria* and *Lophotocarpus*, Jared G. Smith; *Leitneria floridana*, Wm. Trelease; Studies on the Dissemination and Leaf Reflexion of *Yucca aloifolia* and other Species, H. J. Webber; Notes on new or little known Species, J. G. Smith; Notes on the Mound Flora of Atchison Co., Missouri, B. F. Bush.

All of these papers are well illustrated with page plates of excellent drawings.

AMERICAN NATURALIST LIST OF RECENT BOOKS AND PAMPHLETS.

ADAMS, G. I.—The Extinct Felidæ of North America. Extr. Amer. Journ. Sci., Vol. I, 1896. From the author.
